Office Action Summary	Application No. 10/660,471	Applicant(s) PALMBERG ET AL.	
	Examiner Lee Lum	Art Unit 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The disclosure is objected to because of the following issues:

in Claims 1 and 9, "pressure" lacks antecedent basis.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 4, "a valve member" (emphasis added) is unclear because "one valve member" has been established, and it is unknown if another "member" is being referred.

In Claims 5 and 7, "an axis" is unclear because it does not appear that the motor actuates this element, but does actuate a wheel.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Duffy 5029513.

Duffy discloses a hydraulic power steering apparatus comprising

Valve 40 to be actuated on an applied torque (via steering wheel) for altering a pressure of fluid to be received by a power steering system 10,

Wherein the valve is actuated further, according to a control mechanism 98 depending on an external vehicle input parameter (turn executed via steering wheel),

Via hydraulically displacing valve member 70/72 in a rotational manner.

Art Unit: 3611

4. **Claims 4-8** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, and any objections, and/or 112/2nd rejections resolved, respectively. Prior art does not disclose the power steering apparatus comprising the configuration described above, further including a valve member electromechanically actuated via a toothed wheel.

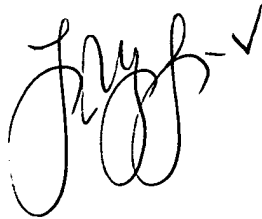

5. The prior art made of record, and not relied upon, is considered pertinent to the disclosure: Shtarkman et al 5517096, Kato et al 5303793, Eckhardt et al 5119898.

6. Communication with USPTO/Examiner
